

The Voltage of Cancer

Runs Through Our Bodies as Microwave Currents

The **VOLTAGE** of **CANCER** is now delivered to everyone from cell towers, Wi-Fi antennas and personal wireless devices. This electromagnetic voltage saturates the environment, indoors and outdoors. No one escapes this hazard, which meets scientific Bradford Hill criteria as a **CONFIRMED HUMAN CARCINOGEN**, on par with asbestos and nuclear radiation.

Thousands of scientific studies confirm that non-thermal microwave energy induces DNA damage, diabetes, cardiovascular disturbances, dementia, hormone disruption, blood abnormalities, tumors and other disabling conditions.

♣ In May 2016, a \$25 million study overseen by the National Institutes of Health (NIH) reported two types of cancer developed by animals exposed to cell phone radiation: glioma brain tumors and malignant growths in the heart. Federal scientists say that this study ends the cancer debate. Mobile phone radiation = CANCER.

♣ Wi-Fi radiation also efficiently initiates and accelerates the growth of tumors. In the 1980s, the U.S. Air Force spent millions of dollars to expose test rats to 2.45 gigahertz radiation (now used for Wi-Fi) at very low non-thermal power. Compared to non-exposed rats, irradiated rats suffered: 16% more benign tumors and 260% more primary malignant tumors. Hundreds of recent studies also confirm that chronic exposure to Wi-Fi radiation is an extreme public health hazard.

♣ Numerous international studies show that people living near cell tower antennas suffer high rates of neurological illness and cancers, indicating that the millions of microwave installations needed to support wireless technologies are dangerous to human health.

About 15.5 million Americans are living with cancer and an additional 1,762,450 people will get a primary diagnosis for invasive cancer in 2019 (4,828 new cases per day, USA).

The Microwave Syndrome

European scientists Dr. Claude Monnet and Dr. Pierre le Ruz have created this reference list of thirteen basic categories that comprise what is known as the Microwave Syndrome. These categories are linked by medical science to non-thermal microwave radiation which now saturates our environment from both wireless antenna installations and personal wireless devices. Within these categories are the diseases, conditions and impairments which propel millions of Americans to seek medical diagnosis and treatment each year:

1. Dystonic Cardiovascular Syndrome includes:

bradycardia (abnormally slow pulse)
tachycardia (abnormally fast pulse)
hyper/hypo blood pressure abnormalities
atherosclerosis and symptoms of heart attack
stroke

2. Chronic Diencephalic Syndrome includes:

dizziness
sleep disorders
concentration disturbances
chronic fatigue syndrome

3. Chronic Asthenia Syndrome includes:

fatigue
irritability
nausea
headache
anorexia
muscle aches and weakness
hair loss

4. Cancerous Pathology Syndrome includes:

solid tumors
leukemia
melanoma

5. Dermatologic Pathology Syndrome includes:

dermatitis
dermatosis
eczema
psoriasis
skin allergies

6. Dopaminergic Pathology Syndrome includes:

restless leg syndrome
numbness in limbs
cramps in limbs during and after sleep
Parkinson's Disease

7. Immune Pathology Syndrome includes:

high lymphocyte count
abnormal white blood cells
abnormal red blood cells

8. Procreative Pathology Syndrome includes:

drastic decrease of libido
infertility
miscarriage
premature birth
toxic fetal syndrome
retarded fetal growth
birth defects

9. Brain Pathology Syndrome includes:

benign and malignant brain tumors
breaching of the blood-brain barrier
electroencephalogram disturbances
brain fog/ loss of memory
tremors
dementia/Alzheimer's

10. Sensory Pathology Syndrome includes:

vision and hearing degradation
allergies
asthma
fibromyalgia
tooth neuralgia (pain) especially in teeth with
mercury amalgam fillings

11. Psychological Pathology Syndrome includes:

irritability
lack of concern, lack of empathy
introversion, passiveness
submissiveness
hyperactivity
attention deficit
agitation under demand
depression
suicidal tendencies

12. Cell Pathology Syndrome includes:

DNA and chromosome damage
abnormal calcium influx and e-flux in cells
abnormal cell membrane permeability (fluid leaks)

13. Endocrine Pathology Syndrome includes:

diabetes
thyroid weakness or malfunction
serotonin deficiency
melatonin deficiency
adrenal deficiency
