

# The Voltage of Cancer

## Runs Through Our Bodies as Microwave Currents

The **VOLTAGE** of **CANCER** is now delivered to everyone from cell towers, Wi-Fi antennas and personal wireless devices. This electromagnetic voltage saturates the environment, indoors and outdoors. No one escapes this hazard, which meets scientific Bradford Hill criteria as a **CONFIRMED HUMAN CARCINOGEN**, on par with asbestos and nuclear radiation.

Thousands of scientific studies confirm that non-thermal microwave energy induces DNA damage, diabetes, cardiovascular disturbances, dementia, hormone disruption, blood abnormalities, tumors and other disabling conditions.

♣ In May 2016, a \$25 million study overseen by the National Institutes of Health (NIH) reported two types of cancer developed by animals exposed to cell phone radiation: glioma brain tumors and malignant growths in the heart. Federal scientists say that this study ends the cancer debate. Mobile phone radiation = CANCER.

♣ Wi-Fi radiation also efficiently initiates and accelerates the growth of tumors. In the 1980s, the U.S. Air Force spent millions of dollars to expose test rats to 2.45 gigahertz radiation (now used for Wi-Fi) at very low non-thermal power. Compared to non-exposed rats, irradiated rats suffered: 16% more benign tumors and 260% more primary malignant tumors. Hundreds of recent studies also confirm that chronic exposure to Wi-Fi radiation is an extreme public health hazard.

♣ Numerous international studies show that people living near cell tower antennas suffer high rates of neurological illness and cancers, indicating that the millions of microwave installations needed to support wireless technologies are dangerous to human health.

About 17 million Americans are living with cancer and an additional 1,806,590 people will get a primary diagnosis for invasive cancer in 2020 (that's 4,950 new cases per day)

# The Microwave Syndrome

European scientists Dr. Claude Monnet and Dr. Pierre le Ruz have created this reference list of thirteen basic categories that comprise what is known as the Microwave Syndrome. These categories are linked by medical science to non-thermal microwave radiation which now saturates our environment from both wireless antenna installations and personal wireless devices. Within these categories are the diseases, conditions and impairments which propel millions of Americans to seek medical diagnosis and treatment each year:

**1. Dystonic Cardiovascular Syndrome includes:**

bradycardia (abnormally slow pulse)  
tachycardia (abnormally fast pulse)  
hyper/hypo blood pressure abnormalities  
atherosclerosis and symptoms of heart attack  
stroke

**2. Chronic Diencephalic Syndrome includes:**

dizziness  
sleep disorders  
concentration disturbances  
chronic fatigue syndrome

**3. Chronic Asthenia Syndrome includes:**

fatigue  
irritability  
nausea  
headache  
anorexia  
muscle aches and weakness  
hair loss

**4. Cancerous Pathology Syndrome includes:**

solid tumors  
leukemia  
melanoma

**5. Dermatologic Pathology Syndrome includes:**

dermatitis  
dermatosis  
eczema  
psoriasis  
skin allergies

**6. Dopaminergic Pathology Syndrome includes:**

restless leg syndrome  
numbness in limbs  
cramps in limbs during and after sleep  
Parkinson's Disease

**7. Immune Pathology Syndrome includes:**

high lymphocyte count  
abnormal white blood cells  
abnormal red blood cells

**8. Procreative Pathology Syndrome includes:**

drastic decrease of libido  
infertility  
miscarriage  
premature birth  
toxic fetal syndrome  
retarded fetal growth  
birth defects

**9. Brain Pathology Syndrome includes:**

benign and malignant brain tumors  
breaching of the blood-brain barrier  
electroencephalogram disturbances  
brain fog/ loss of memory  
tremors  
dementia/Alzheimer's

**10. Sensory Pathology Syndrome includes:**

vision and hearing degradation  
allergies  
asthma  
fibromyalgia  
tooth neuralgia (pain) especially in teeth with  
mercury amalgam fillings

**11. Psychological Pathology Syndrome includes:**

irritability  
lack of concern, lack of empathy  
introversion, passiveness  
submissiveness  
hyperactivity  
attention deficit  
agitation under demand  
depression  
suicidal tendencies

**12. Cell Pathology Syndrome includes:**

DNA and chromosome damage  
abnormal calcium influx and e-flux in cells  
abnormal cell membrane permeability (fluid leaks)

**13. Endocrine Pathology Syndrome includes:**

diabetes  
thyroid weakness or malfunction  
serotonin deficiency  
melatonin deficiency  
adrenal deficiency
